## RECENT EXPERIENCE

### **FanapPlus** - *Backend, Full-Stack & Mobile Developer*

Nov 2016 - PRESENT

- The first team I joined was as backend developer HadsOn, a mobile product concentrating on people predicting football. We were responsible for refactoring a huge mess of legacy code, redesigning the architecture and implementing lots of new features.
- For a short time, I was assigned the task of developing an application for the company, later discontinued.
- The last team I joined as full-stack developer and currently work in, is Ramoon, a product aimed for parents.

### **Sharif Career School** - *Backend Developer*

March 2016 - Sep 2016

### **Hamrahe Aval(MCI)** - *Intern*

Aug 2016 - Oct 2016

- Working closely with portal specialists team, controlling portal-related projects.

### **Nimboos** - *Co-Founder*

Aug 2016 - Oct 2016

- Nimboos was a startup developing a smart product for kids. I worked as the main developer. The project was discontinued due to personal reasons.
